ABOUT ME

React Native developer with **shipped, live, revenue-generating apps** on the DApp Store, each with **10,000+ downloads** and active user ratings. Experienced in cross-platform mobile development, blockchain wallet integration, real-time data handling, and smooth UI/UX across Android and iOS.

EXPERIENCE

Stealth AI Startup

July 2026 – Present

Founding Engineer

Hybrid

- Building React Native and Swift mobile apps end-to-end for iOS and Android, from payments with RevenueCat through App Store and Play Store submission.
- Owning the backends powering the apps, shipping with Expo, EAS Build, and Xcode.
- Building Meta Ads automation pipelines in Python.

Talkamore

April 2026 – June 2026

Founding Engineer

Remote

- Built and designed the product end-to-end across web and mobile for both App Store and Play Store.
- Owning system design and the core backend, with a focus on scalability and real-time features.
- Shipping production features in a fast-moving early-stage team.

Krane Apps

September 2025 – April 2026

Blockchain and Backend Developer

Remote

- Building backend services and on-chain integrations for client products.
- Working across Web3 tooling and Solana program interactions.
- Delivering APIs and data flows that power web and mobile clients.

PROJECTS

Talkamore | *React Native, Expo, TypeScript, TanStack Query* | 🌐 Live

Live on App Store

- Built the **Mobile and Web app end-to-end** in React Native and Expo over a Node + Postgres backend, with Auth0 PKCE auth and JWTs stored in **expo-secure-store**.
- Built **real-time AI chat streaming** with a navigation-independent engine so replies finish across screens, with quota, persona, and memory recall handled server-side.
- Delivered polished cross-platform UI across iOS and Android: journaling with inline photos, animated draggable sheets, and live insights.

Luna AI | *React Native, OpenAI API, Hugging Face, TypeScript* | 🐙 GitHub

Live on DApp Store

- Built a production AI companion app with fully optimised mobile UI for smooth conversational interactions.
- Integrated **Hugging Face Inference** and **OpenAI APIs** for real-time AI responses with async data handling and efficient state management.
- Achieved 10,000+ downloads with active user ratings; currently generating revenue on the DApp Store.

Solana Near Me | *React Native, Solana Web3.js, TypeScript* | 🐙 GitHub

Live on DApp Store

- Developed a **blockchain-integrated location app** using React Native and Solana Web3.js, combining geolocation features with on-chain data.
- Implemented cross-platform UI optimisation ensuring smooth performance on both Android and iOS form factors.
- Handled **async data fetching**, **REST API integration**, and real-time location state management within the app.

SolPin Arcade | *React Native, TypeScript, Solana, Web3.js* | 🐙 GitHub

Live on DApp Store

- Built a **cross-platform arcade staking game** in React Native featuring a custom **HTML5 Canvas-based physics engine** for real-time gameplay and animations.
- Integrated **Solana** for wallet authentication, secure staking, and reward distribution using smart contracts.

TECHNICAL SKILLS

Mobile: React Native, Swift, Expo, EAS Build, Xcode, RevenueCat, Mobile Wallet Adapter (MWA)

Languages: TypeScript, JavaScript, Swift, Python

State & Data: REST APIs, WebSockets, Async handling, Prisma, PostgreSQL

Web / Backend: React.js, Next.js, Node.js, Express.js, Docker, AWS, CI/CD

EDUCATION

Indian Institute of Technology, Guwahati

2025 – 2029

Bachelor of Science in Computer Science

Guwahati, Assam
